SESSION SUMMARY (C/SS)

DT-S (ATTN: 003)

1. (S-SS) STATISTICS:	Viewer:	018
	Session date:	21 OCT 88
	Start time:	1122
	End time:	1218
	Mode of operation:	CRV
	PI:	None
	AV:	Operational

2. (S-SS) CUING: Encrypted coordinates 307281/819446.

3. (S-SS) RESULTS:

a. First impressions of the site were of a bunch of structures, almost like a town which had been built up along a long, main highway (AOL: like Miami, etc). There were early impressions of water and/or sand.

b. Of particular interest was a group of buildings built in an arc around a central point (see sketches, pages 6 & 6). There were impressions that this might be some sort of hotel.

c. A person in one of the buildings was accessed. He was found to be idle and bored, "biding his time". When I tried accessing the proper site through him, he had a mental image of a long, low, grey structure (or group of similar structures) out in the open. There were "knocks" associated with this structure. I got the impression from him that this structure(s) had the purpose of a "factory" or "plant".
